

New and improved conference list:

Conference	Day	Time	Location	Point person	Brief description
CP	Monday	8AM			2-year curriculum
Diagnostic Path	Tuesday	12PM			Presentations on interesting AP and CP cases by faculty and residents (see prior email)
Unknowns	Wednesday	8AM			Mix of unknown slides, residents review and come prepared. Last session of the month will be the Frozen conference.
AP (systemic)	Thursday	8AM			2-year curriculum, will also now incorporate cytology.

Thus, there will be 4 resident conferences per week, and no conferences scheduled on Fridays. We accomplished this by reducing the redundancy that had proliferated unchecked over the years. As noted in a prior email, the DPC will meet 3 weeks per month. This all leaves other slots open for departmental conferences like Grand Rounds.

As faculty in a teaching facility, we are all expected to teach residents during these conferences. The point person for each conference can discuss preferred format etc with you.

Faculty are always welcome to attend any of these, and we'd especially encourage involvement in the DPC and unknowns.

Specifically the DPC is ***designed*** to engage both faculty and residents and we hope to have full participation.
