ANNUAL ANTHONY G. DIBARTOLOMEO
INTERNAL
MEDICINE
CONFERENCE

Friday, September 2, 2022

Morgantown Marriott at Waterfront Place

Named in honor of

Anthony G. DiBartolomeo, MD

Anthony G. DiBartolomeo, MD, earned his medical degree from the WVU School of Medicine in 1967, completed residency training at the University of Minnesota, and completed a fellowship at the University of Pittsburgh. A United States Army veteran, Dr. DiBartolomeo served as a rheumatologist for the Walter Reed General Hospital in Washington, DC, then moving on to serve WVU as Professor of Medicine and Chief of the Section of Rheumatology. Dr. DiBartolomeo faithfully served the WVU School of Medicine in many roles, and was awarded outstanding teacher and outstanding faculty awards throughout his time with the institution.

LEARNING OBJECTIVES

By attending the conference, participants should be able to:

- Discuss pulmonary hypertension in ILD
- Critically examine long-term PPI use
- Differentiate patients who are potential candidates for obesity care
- Differentiate between nodules and adenomas
- Identify advances in therapeutic endoscopic procedures for the management of early gastrointestinal cancers
- Define how pathogenic organisms may be spread in healthcare settings and factors that influence the outcome of an exposure
- Describe applications of outpatient antimicrobial therapy: WVU Medicine OPAT and COpAT
- Discuss background, epidemiology, clinical manifestations, and mimickers of Raynaud's phenomenon
- Evaluate the patient with Raynaud's phenomenon and discuss treatment options
- Define organizational culture and explore techniques to build a strong, healthy organizational culture
- Recognize psychological safety and its important role in healthcare
- Apply the paradigm of strong-linked and weak-linked sports to healthcare and describe how the winningest coach in NBA history built culture in a sport that de-emphasizes collective play
- Identify the best practices in treatment for patients in the institution by understanding what is available and how to consult the appropriate services
- Discuss the impact of cannabis on health with patients and describe the current evidence regarding cannabinoids
- Discuss different types of cancer immunotherapy and adaptive immune response
- Describe the mechanism, benefit, toxicity and treatment of immune checkpoint inhibitors
